1870  
The first of the year  
was a very cold one  
and the snow lay  
deep on the ground  
for many days  
The weather was  
very disagreeable  
and the people  
were much  
convinced of the  
necessity of  
clothing.

## OFFICE FUNCTIONAL STATEMENTS

### PRODUCTION & MARKETING ADMINISTRATION - General Statement

The Production and Marketing Administration comprises nine commodity and eleven functional branches, and the Commodity Credit Corporation. The nine commodity branches are: Cotton, Dairy, Fats and Oils, Fruit and Vegetable, Grain, Live-stock, Poultry, Sugar, and Tobacco. With few exceptions, all USDA programs affecting these commodities are centered in the above branches thus giving a focal point for commodity program responsibility and authority. The eleven functional branches are: Agricultural Conservation Programs, Shipping and Storage, Fiscal, Price Support and Foreign Supply, Food Distribution Programs, Marketing Facilities, Marketing Research, Audit, Information, Compliance and Investigation, and Budget and Management.

In general, the names of the functional branches indicate their functions and responsibilities.

The Commodity Credit Corporation engages in lending, buying, selling and other activities with respect to agricultural commodities, for purposes of stabilizing, supporting, and protecting farm income and prices, maintaining adequate supplies of agricultural commodities and facilitating the orderly distribution thereof.

Several of the functional branches, and the Commodity Credit Corporation have area offices in the Southeast Area with headquarters at Atlanta. Eight of the nine commodity branches have one or more field offices located throughout the Area.

The following are brief statements of PMA Field Operations in the Southeast Area.

#### AUDIT BRANCH AREA OFFICE

The Audit Branch Office formulates within the Southeast Area audit policies and directs the audit and examining activities of PMA, its agents, and all others financed with PMA funds; conducts cost analyses of commercial organizations and of individuals contracting with PMA, for the purpose of providing financial data to enable PMA officials to renegotiate or terminate contracts.

#### BUDGET AND MANAGEMENT BRANCH AREA OFFICE

##### AREA BUDGET AND MANAGEMENT BRANCH OFFICE:

Performs management services for PMA in the Southeast Area including general supervision of the Area Administrative Services Division and the Area Personnel Division.

##### Administrative Services Division:

Serves PMA offices in the Southeast Area on general administrative house-keeping matters, such as space, utility and service contracts, motor equipment, property utilization, records and communications, supplies and forms.

## BUDGET AND MANAGEMENT BRANCH AREA OFFICE (Cont'd)

### Personnel Division:

Handles general personnel matters for PMA offices and employees in the Southeast Area including employment, classification, employee relations, safety and training activities.

### THE COMMODITY CREDIT CORPORATION

The Commodity Credit Corporation is a Federal agency established to assist American agriculture. The Corporation, through resources made available by Congress, is able to provide an economic stability for agricultural production and marketing not available through facilities of commercial organization.

The activities of the Corporation fall into six general categories: (1) price-support programs; (2) supply programs; (3) foreign-purchase programs; (4) commodity export programs; (5) subsidy programs; and (6) loans to the Secretary of Agriculture for agricultural conservation purposes.

The Atlanta CCC Field Office performs the shipping, storage and fiscal functions required for these programs in the Area and coordinates such activities with related purchase and distribution functions of the programs as performed by State PMA Offices, Commodity Branch Field Offices, banks, warehouses and other groups.

### SHIPPING AND STORAGE DIVISION:

Plans, directs, and conducts the shipping and storage of PMA and CCC owned commodities for both domestic and export programs. Works with railroads, steamship lines and other carriers to move commodities and with warehousemen and pier storage officials to store such goods pending their movement to an assigned program.

### FISCAL DIVISION:

Performs examination and accounting functions for the purchase and sale of commodities under price-support, supply, loan and related programs in the Area. Compiles periodic and special inventory, financial and accounting reports reflecting program status and financial position.

Performs examination and accounting functions of administrative expenses (except for the State Offices) incurred including payroll, travel, space and communication vouchers and other miscellaneous purchase and/or service items.

### COMMODITY DIVISION:

Within the limitations of approved programs and in accordance with technical direction from Branches, plans and directs a comprehensive plan of action covering the commodity aspects of assigned purchase, price support, processing, diversion, supply and related programs.

## COMPLIANCE AND INVESTIGATION BRANCH AREA OFFICE

The Compliance and Investigation Branch Area Office investigates within the Southeast Area alleged violations involving PMA's programs of procurement, sales, subsidy, price-support, school lunch, surplus property disposal, agricultural adjustment and conservation, and regulation; conducts accounting investigations, and installs and services accounting systems for market administrators and others.

### COTTON BRANCH

In accordance with the United States Cotton Standards Act, the United States Cotton Futures Act, the Smith-Doxey Act, and similar legislation, the Department of Agriculture executes a number of programs designed to improve cotton and its marketing. As part of this work, the Cotton Branch establishes official standards for the classification of cotton moving in interstate or foreign commerce; provides for the classing of cotton in accordance with such standards by regularly employed personnel and by private individuals who have demonstrated their qualifications and have been licensed as cotton classers; furnishes classing and other services to organized cotton improvement groups; provides information concerning prices, markets, methods of cultivation and harvesting, ginning improvements, suitability of specific types of cotton to certain end uses, and related matters to those interested in the cotton industry; and presents and reviews the use made of official standards in reporting market transactions.

In the Southeast Area there are three separate and distinct offices of the Cotton Branch in the Area reporting individually to the Cotton Branch in Washington and engaged in carrying out one or more of the above programs. They are as follows:

#### SOUTHEASTERN AREA OFFICE - Located in Atlanta, Georgia

This office coordinates the work of seven local classing offices located within the jurisdictional area which are engaged in the classing of cotton, the servicing of cotton improvement groups, the collecting and dissemination of market news information and related functions. In addition, the Area Office collects, compiles and publishes statistics on cotton quality, grade and staple of the crop and carryover, cottonseed quality, cotton and cottonseed prices.

#### SOUTH CENTRAL AREA OFFICE - Located in Memphis handles identical programs for its jurisdictional area.

#### SUPERVISION OF CLASSING AND GRADING SECTION - Located in Memphis, Tennessee

This office is comprised of a Board of Supervising Cotton Examiners and an Appeal Board of Review Examiners in which is vested responsibility for technical supervision and control over all field cotton classing activities. The Board of Supervising Cotton Examiners maintains nationwide uniformity in the interpretation and application of official standards and regulations by reviewing classification determinations made by local classing offices and by licensed classers and bringing them in line when necessary. The Appeal Board of Review Examiners receives appeals from the

## COTTON BRANCH (Cont'd)

### SUPERVISION OF CLASSING AND GRADING SECTION (Cont'd)

trade on classing determinations made by local classing offices and makes final decisions. In addition, this office examines, licenses and supervises non-government cotton classers who are employed by commercial concerns.

There are two Cotton Branch Laboratories in the Southeast Area engaged in various phases of economic and technological research and development programs on ginning, packaging, sampling, handling, marketing, testing and processing of cotton and cotton products. They are as follows:

#### STONEVILLE LABORATORY - Located at Stoneville, Mississippi

Plans, designs and constructs improved machinery, equipment and instruments for sampling, testing, ginning and otherwise processing and handling cotton, fiber, and cottonseed. Conducts tests of cotton and fiber properties for cotton breeder and others. Conducts economic studies of the various systems and methods of harvesting, conditioning, cleaning, ginning and storing of cotton and cottonseed in use throughout the country.

#### CLEMSON LABORATORY - Located at Clemson, S. C.

Conducts research and development work on methods and equipment for testing and measuring the physical and chemical properties of cotton fibers, yarns and fabrics. Conducts fiber and spinning tests for cotton breeders, merchants, manufacturers and others.

## DAIRY BRANCH FIELD OFFICE

The Atlanta Market News Field Office collects and disseminates information on general market conditions, prices, supply, demand, transactions and related factors affecting the Atlanta metropolitan area market on dairy and poultry products.

## FATS AND OILS BRANCH FIELD OFFICES

Branch Field Representatives are stationed at the headquarters of the Georgia-Florida-Alabama Peanut Association and Virginia-Carolina Peanut Association at Camilla, Georgia, and Franklin, Virginia, respectively, for the purpose of maintaining liaison between the Branch and the Associations which are the designated agents of the government in the execution of peanut purchase and loan programs. In addition, these Field Representatives direct a program for the grading of peanuts bought, sold, stored or otherwise handled under the programs administered by the Associations.

## FOOD DISTRIBUTION PROGRAMS BRANCH

PMA's Food Distribution programs have a two-fold objective: to increase the domestic consumption of agricultural food products and to improve the nutrition of our people. The programs include the school-lunch, direct-distribution, food-preservation and marketing abundant foods. Briefly these programs

## FOOD DISTRIBUTION PROGRAMS BRANCH (Cont'd)

are as follows:

Under the National School lunch Act, the Department of Agriculture makes grants-in-aid to States and private educational agencies to provide school lunches.

Direct-distribution programs involve the diverting of food from normal channels of trade to the school-lunch program, to institutions, and to welfare recipients.

The chief aims of the food-preservation program are to provide additional outlets for price-support and locally grown foods during periods of peak supply, thereby avoiding loss through waste and spoilage and helping improve the quality of lunches served in schools.

When supplies of a particular food are in excess of normal demand, special marketing programs are undertaken by PMA to encourage increased consumer purchase and use of that food through normal channels of trade, thereby minimizing the need for price-support or surplus-removal programs.

### FRUIT AND VEGETABLE BRANCH FIELD OFFICES

#### MARKETING FIELD OFFICES:

These offices located in Atlanta, Georgia and Lakeland, Florida, assemble information on fruit and vegetable production and marketing problems and practices in the Area and report such data to the Washington office with recommendation of action needed to improve conditions. Execute supply purchase and sales programs and assist in the administration of price-support, subsidy and related programs.

#### FRESH PRODUCTS STANDARDIZATION AND INSPECTION DIVISION:

Provides inspection service on fresh fruits, vegetables and miscellaneous commodities at shipping points, in transit, and at market or destination points.

#### PROCESSED PRODUCTS STANDARDIZATION AND INSPECTION DIVISION:

Provides inspection services on canned, dried, dehydrated and frozen fruits, vegetables and miscellaneous commodities at processing establishments, storage, shipping, transit, or receiving points.

#### MARKET NEWS DIVISION:

Collects, compiles and issues reports on supplies, market conditions, and prices of fresh fruits and vegetables and miscellaneous commodities.

#### REGULATORY DIVISION:

The Division administers the Perishable Agricultural Commodity Act, Produce Agency Act, Export Apple and Pear Act, and Standard Container Acts. These Acts are designed to protect the producers, handlers, and consumers in the marketing and/or purchasing of fruit and vegetables.

## GRAIN BRANCH

### REGULATORY AND INSPECTION DIVISION:

The United States Grain Standards Act requires that certain grain be inspected, graded, and certificated according to official standards when it is merchandised by grade in interstate or foreign commerce from or to an inspection point. The primary inspection of grain is performed by inspectors of State and trade inspection departments and in some cases by independent inspectors, all of whom are licensed by the Secretary of Agriculture. Grain Branch offices are maintained at headquarters in districts comprising definite areas for the purpose of supervising the work of the licensees and handling appeals from inspections made by them. These offices also aid in enforcing provisions of the Act which are designed to prevent fraud and misrepresentation in marketing grain.

There are two such district offices in the Southeast Area located at Louisville, Kentucky, and Nashville, Tennessee, engaged primarily in the administration of the Grain Standard Act within their jurisdictional area. These field offices also assist in the administration of other programs and services of the Branch within their area.

The Federal Seed Act (1) requires complete labeling of seed in interstate commerce and (2) prohibits the importation of agricultural and vegetable seed which falls below fixed standards of quality. Productive agriculture in the U. S. requires the planting of good quality seed of adapted varieties. The buyer is able to choose such seed only if he finds it possible to rely upon representations made. It is not possible to determine the inherent value of seed by casual examination. Each State has a seed law requiring correct labeling of seed offered for sale within the State. The Federal Seed Act supplement these State seed laws.

The Federal-State Seed Laboratory at Montgomery, Alabama, is engaged in the administration of both phases of the Federal Seed Act including the analysis of seed samples, the reporting of results and on occasion the development of case data for use in the prosecution of violators.

## INFORMATION BRANCH

The Information Branch area Office in the Southeast Area collects and disseminates information on PMA programs and operations; furnishes requested information to other Government agencies, producers, processors, trade associations, newspapers, trade and general magazines, wire services, and radio stations.

## LIVESTOCK BRANCH

### STANDARDIZATION AND GRADING DIVISION:

The ten Meat Grading Field Offices in the Southeast Area are staffed with Meat Graders who grade according to Government standards meats and meat food products intended for human consumption. Grading is at the request of commercial organizations and is on a fee basis. On occasion, they grade and examine meat and meat food products purchases by government agencies for adherence to purchase specifications.

## LIVESTOCK BRANCH (Cont'd)

### MARKET NEWS DIVISION:

Market News Reporters assigned to the four Market News Field Offices in the area collect, summarize and disseminate information as to receipts, prices and market conditions of Livestock production and sale in their respective areas. This information is distributed by means of leased wires, mimeographed reports, commercial news dispatches, radio and press releases.

### PACKERS AND STOCKYARDS DIVISION:

This Division administers the Packers and Stockyards Act to regulate rates and practices of agencies, packers, and others engaged in marketing livestock, meats, and live poultry in interstate commerce. The two offices in this area conduct regulatory audits to determine compliance with the Act.

### INSECTICIDE DIVISION:

This Division administers the Insecticide Act for the protection of farmers, manufacturers and other users and producers from harmful or ineffective insecticides and fungicides, including disinfectants, which are used for the protection of health.

The Bradenton, Florida office collects, analyzes, and tests samples of insecticides and fungicides subject to the Act, developing evidence of misbranding or adulteration and evidence of interstate shipment and identity of material.

The Atlanta, Georgia office obtains information for preparation of citations and affidavits for use in prosecution of violators.

## MARKETING FACILITIES BRANCH

One of the assignments of PMA is to improve the physical handling of farm products throughout marketing channels. This work includes the development of plans and promotion of construction of proper market facilities for the assembly and distribution of all products; finding out how handling costs can be reduced by use of proper kinds of equipment, the conduct of programs designed to obtain adequate transportation facilities and equitable freight rates; and the development and operation of storage programs.

The Atlanta, Memphis and Raleigh Field Offices are primarily concerned with the inspection and licensing of cotton warehouses in the Area to provide optimum warehousing conditions for the trade. The Warehouse Examiners attached to these offices also inspect storage facilities which the Commodity Credit Corporation is using or proposes to use for the storage of certain products owned by it. In addition to inspecting and approving or disapproving the facility prior to storage, this service includes inspection about every 60 days of the commodities stored, to check on condition and to account for the quantity stored.

## PMA STATE AND COUNTY OFFICES

In the Southeast Area, there are nine State PMA Offices and the Caribbean Area Office. These offices are responsible for administration in the field of the agricultural conservation and adjustment programs, commodity loans, marketing quotas, production goals, assigned price support operations, and other programs as assigned. They determine the production needs of the State based upon the recommendations of the county offices and analysis of other information available to the State Office and assist in marketing studies and programs. They adapt national programs to State needs and provide general guidance to county agricultural conservation committees.

A State Committee is composed of from three to five members, selected from among the agricultural leaders of the State, and the State Director of the Extension Service who serves in an ex-officio capacity. These committees provide the necessary administrative connecting link between the Administrator of PMA and the county and local committees. The State Committees make possible a concerted nationwide effort to conserve the soil, to attain production goals, and to provide marketing outlets. They not only administer the programs in their respective states, but they also provide a means of incorporating locally needed conservation practices and production and marketing needs into national programs.

Every agricultural community or township in the United States has its farmer-elected committeemen. Each year between the end of one production season and the beginning of the next, farmers participating in the agricultural conservation program hold elections in each of the nation's 34,134 agricultural communities to name membership on the local community or township committees. They also elect delegates to a county meeting at which participating farmers are named to the county committee.

This organization of farmers, more than 9,000 committeemen and more than 100,000 community committeemen, is the backbone of PMA's operations in the field of production. The primary function of these committees is to develop program practices, adapt practices to local conditions, and provide the necessary local assistance in administering the programs.

### POULTRY BRANCH

The Atlanta Marketing field Office assembles information on poultry production and marketing practices and problems in the Area and reports such data to the Washington Branch Office with recommendation on action needed to improve conditions. They also interpret programs of the Administration to poultry producers and dealers and, when in effect, carry out purchase and sales programs of the Branch.

### TOBACCO BRANCH

#### MARKETING SERVICES DIVISION:

In accordance with provisions of the Tobacco Inspection Act and related legislation, the Federal Government establishes official standards and regulations for the grading of tobacco in inter-state or foreign commerce, designates certain auction markets at which all tobacco sold is subject to mandatory inspection and grading, for which service no charge is made; inspects and grades tobacco, for a specified fee, upon request by growers,

## TOBACCO BRANCH (Cont'd)

### MARKETING SERVICES DIVISION (Cont'd)

buyers, sellers, warehousemen, and other members of the trade; furnishes information and demonstrates appropriate methods of sorting and otherwise preparing tobacco for market; and furnishes supply, demand, price, and other market information to growers and trade organizations.

The chief field functions of the Tobacco Branch are the inspection of tobacco and the reporting of prices established by current sales. This work is carried out during the tobacco marketing season by federal inspectors and market news reports located at auction markets and central points throughout the tobacco belt.

The combination of inspection service and market news service gives farmers information as to the grade of each lot of tobacco offered for sale and the average price at which each grade has actually been selling. On the basis of this information, the farmer is enabled to make an intelligent decision on whether or not to accept the price offered for his product.

After the close of the marketing season, federal inspectors engaged in demonstration work with groups of farmers and students for the purpose of giving instruction in the sorting and arranging of tobacco for marketing and for furnishing information regarding the value and use of grading.

### NAVAL STORES DIVISION:

This Division administers the Naval Stores Act.

At field points in the Area, Branch representatives exercise technical supervision over and give instruction to Naval Stores Inspectors employed by private concerns who are engaged in the grading and chemical analysis of turpentine and rosin that are purchased according to government specifications or are placed in government loan.
